

Eco Systems Engineering

Eco-Systems, Inc. (Eco-Systems) is a multidisciplinary, professional services firm specializing in environmental engineering and consulting. Since 1993, our firm has provided the highest level of technical quality, client-focused service, and real value to numerous large and small clients across the United States.

Eco-Systems focuses on assisting private clients with achieving and developing environmental solutions through strategic planning and the application of innovative technologies and approaches. Eco-Systems addresses environmental problems through a systems engineering approach that incorporates all of the appropriate elements affecting a problem in order to evaluate all options and identify the best and least-costly solutions.

From strategically located offices in Houston, Texas; Jackson, Mississippi; Meridian, Mississippi; Mobile, Alabama; Atlanta Georgia; Jackson, Tennessee; and Hattiesburg, Mississippi, Eco-Systems has performed projects in over 20 states, including Alabama, Mississippi, Georgia, South Carolina, Arkansas, California, Missouri, Kansas, Texas, Louisiana, Florida, Tennessee, Ohio, Oklahoma, Kentucky, North Carolina, Virginia, West Virginia, Michigan, Pennsylvania, New York, and Maryland. This varied experience has given our firm a broad understanding of the regulatory and physiographic character of many parts of the nation.
